

Foreign transaction list in BgMax format

Version	Author	Changed section
December 2013	Minna Sällström	Original version
March 2016	Minna Sällström	OP's name change update
October 2018	Minna Sällström	BankGiro web site update
December 2021	Minna Sällström	general update

1 Guidelines

A company operating in Finland may receive payments on its Swedish BankGiro account containing either reference numbers or messages through BankGiro central. The company can retrieve a foreign transaction list in BgMax format through OP's Web Services.

The customer must have a valid Web Services agreement with the bank. The bank is given the number of the account on which payments are made. Customers also ensure that their software is able to retrieve a foreign transaction list in BgMax format.

We will route our customers' BgMax material on the basis of the BankGiro customer number contained in it. Once we have received the material from Bankgiro central, we will transfer it to Web Services for you to retrieve.

A service fee according to the service price list will be charged.

The message descriptions are subject to change. Go to Bankgiro's web site for up-to-date descriptions.

Bankgiro's description of the transaction list:

[Bankgiroinbetalningar tekniskmanual](#)

The file type used in the retrieval:

BgMax = foreign transaction list in BgMax format.

Example message:

```
