OUTLOOK 2018

In 2018, OP's EBT is expected to be at about the same level as in 2017

The most significant uncertainty related to the earnings for the rest of the year is associated with the amount of the non-recurring item arising from the transfer of the portfolio of the statutory earnings-related pension insurance for OP Financial Group's personnel. The transfer will improve the Group's CET1 ratio by an estimated 0.4 pps and earnings before tax by €240 mn, based on the current estimate. Other uncertainties are associated with other potential effects of significant changes in the interest rate and investment environment as well as impairment losses.

OP has solid capital adequacy compared to requirements

Management buffers 9.25% (CET1) and 7.85% (total capital ratio)

In June 2018, the FIN-FSA decided to set a 2% systemic risk buffer on OP Financial Group, ie. a capital buffer requirement that will enter into force on 1 July 2019. At the same time, it also confirmed OP Financial Group's O-SII buffer requirement at 2%. Considering that these capital buffer requirements are parallel buffers and the larger one is applied, the decision will have no effect on OP Financial Group's total capital adequacy requirement.
