

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OP-Sustainable World Fund, A-share class (ISIN: FI4000210539)

This fund is managed by OP Fund Management Company Ltd, which is part of the OP Group.

Objectives and Investment Policy

OP-Sustainable World is a balanced fund which invests its assets in global equity and bond markets.

The Fund promotes environmental and social characteristics and, to ensure it, uses environmental, social and governance (ESG) analysis and excludes certain investments. For more information about the ESG methods used, see the fund prospectus. The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund’s investments in fixed income instruments may account for 30–70% of the Fund’s value and those in equity-linked instruments for 30–70%. In its investment operations, the Fund may use derivative instruments in order to hedge against the risk of adverse market movements, to replace direct investments and to promote otherwise effective portfolio management. Derivatives are chiefly used to manage equity and interest rate risks.

The focus is on fixed income instruments issued by public institutions and companies with a good credit rating. BBB or comparable represents the minimum rating for issuers. The Fund may also to a limited extent invest its assets in fixed income

instruments issued by issuers with a lower credit rating or by non-rated issuers. The Fund makes its fixed income investments mainly in fixed income instruments issued by public sector entities and companies in the European and OECD bond markets.

The Fund’s benchmark index is a combination of several indexes. The composition of the benchmark index is described in the fund prospectus. With active investing, the Fund seeks to outperform its benchmark index in the long term. The Fund mainly takes notable active risk and it may differ significantly from the composition, weights and risk level of the benchmark index.

The Fund uses a relative Value at Risk (VaR) analysis to monitor total risk. The Fund’s VaR may not be more than double the benchmark portfolio’s VaR. More information on VaR calculation can be found in OP Fund Management Company’s fund prospectus.

Any income received from the investments of the fund is reinvested in the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 4 years.

Shares in the mutual fund can be purchased, sold or changed Each Banking Day. If the execution order is received by 15:00:00, the order is executed to the value of the order date.

Risk and Reward Profile

The synthetic risk and reward indicator (SRRI) describes the risk of NAV fluctuation of units in the fund based on the actual fluctuation over the five preceding years. The indicator places the fund in category 4, which means that there is a moderate risk of NAV fluctuation associated with the fund unit. It should be noted that even the lowest risk category of 1 does not mean a risk-free investment. Historical data, such as those used in the calculation of the synthetic risk-reward indicator, do not necessarily give a reliable view of the future, and therefore the risk category of the fund may also change.

For any period before the launch of the fund, the SRRI has been derived on the basis of a representative model portfolio.

Equity market risk, currency risk, credit risk, interest rate risk and style risk form the key risks associated with the NAV performance of the Fund.

Equity market risk may cause changes to the Fund’s value because of the general stock market developments or changes related to an individual company.

The Fund may invest in non-euro-area markets involving currency risks. The investments’ value in euros increases when currency appreciates and, correspondingly, decreases when currency depreciates.

Credit risk may cause changes in the Fund’s value when credit risk premiums rise or falls on the securities market or, for example, when an individual issuer defaults. As a rule, a rise in credit risk premiums affects the Fund’s value and its holdings negatively and, correspondingly, a fall in credit risk premiums positively.

Interest rate risk may cause changes when the value of Fund’s general interest rate rises or falls. Changes in interest rates usually have a reverse effect on the Fund’s value, i.e. a rise in the interest rate has a negative effect and a fall in the interest rate has a positive effect on the present value of investments.

The Fund invests in companies of a certain style or size and thereby the value performance of investments may deviate considerably from the general equity market development.

Charges for this Fund

Fees paid by investors are used to cover the fund's operating costs, such as marketing and distribution costs. These costs reduce the possible return on the investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.50%

These are maximum fees that may be charged for the investment when units are subscribed for or redeemed.

Charges taken from the fund over a year

Ongoing charges	1.25%
------------------------	-------

Charges taken from the fund under specific conditions

Performance fee	No performance fee is charged for this Fund.
------------------------	--

For OP's owner-customers, the subscription and redemption fee is 0.00%. For more detailed information on fees can be found out in the price list, and from the management company or its agents.

The ongoing charges figure is based on expenses for the half-year ending 30th June 2022. The figure may vary from year to year. It excludes: Performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in other funds. For more information about charges, please see section Price List of the Prospectus, which is available at www.op.fi.

Past Performance

Historical returns are not a guarantee of future returns.

Subscription and redemption fees are not taken into account in the return. The management fee is taken into account (deducted) in the return.

The Fund was launched in 2016.

The currency in which the past performance has been calculated is euro.

The Fund's benchmark index is a combination of several indexes. The composition of the benchmark index is described in the fund prospectus.

The Fund didn't have a benchmark index before 1.1.2020.
