

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OP-Climate Fund, A-share class (ISIN: FI0008805254)

This fund is managed by OP Fund Management Company Ltd, which is part of the OP Group.

Objectives and Investment Policy

OP-Climate is an equity fund that mainly invests its assets in the global equity market. Investments may be made in both developed and emerging equity markets, but the investments are typically somewhat tilted towards Europe and the United States.

The Fund makes sustainable investments (Article 9 of Regulation (EU) 2019/2088 SFDR) focusing on environmental issues. The Fund prioritises investments that are expected to help in curbing climate change. For more information about how the Fund integrates sustainability factors, see the fund prospectus.

In the Fund's investment activities, the principles of sustainable development are taken into account with a particular emphasis on environmental issues. The fund's assets are primarily invested in sectors where climate change and preparation for it are expected to have the largest positive impact. The fund's portfolio companies are typically businesswise positioned for combating global warming, and their business is related to for example energy efficiency and technology, recycling, water and waste management and related infrastructure.

The fund's investments are primarily made through direct equity investments. The fund may use derivatives instruments in its investment activities to hedge against market fluctuations, to replace direct investments and to otherwise promote efficient portfolio management.

The fund's assets are diversified in the shares of many

companies. Typically the fund invests its assets in the shares of about 50-80 companies, but this number may vary reflecting the views taken by the portfolio manager.

The Fund's equity exposure may vary so that a minimum of 75% and a maximum of 105% of the Fund's NAV is invested in the equity markets. Typically the equity weight ranges between 90-100 %.

The Fund's benchmark is the MSCI World Climate Paris Aligned Net. With active investing, the Fund seeks to outperform its benchmark index in the long term. The Fund mainly takes notable active risk and it may differ significantly from the composition, weights and risk level of the benchmark index.

The Fund uses a relative Value at Risk (VaR) analysis to monitor total risk. The Fund's VaR may not be more than double the benchmark portfolio's VaR. More information on VaR calculation can be found in OP Fund Management Company's fund prospectus.

Any income received from the investments of the fund is reinvested in the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Shares in the mutual fund can be purchased, sold or changed Each Banking Day. If the execution order is received by 16:00:00', the order is executed to the value of the order date.

Risk and Reward Profile

The synthetic risk and reward indicator (SRRI) describes the risk of NAV fluctuation of units in the fund based on the actual fluctuation over the five preceding years. The indicator places the fund in category 6, which means that there is a high risk of NAV fluctuation associated with the fund unit. It should be noted that even the lowest risk category of 1 does not mean a risk-free investment. Historical data, such as those used in the calculation of the synthetic risk-reward indicator, do not necessarily give a

reliable view of the future, and therefore the risk category of the fund may also change.

Equity market risk, style risk and currency risk form the key risks associated with the NAV performance of the Fund.

Equity market risk may cause changes to the Fund's value because of general stock market developments or changes related to an individual company.

The Fund invests in companies of a certain style or size and thereby the value performance of investments may deviate considerably from the general equity market development.

The Fund may invest in non-euro-area markets involving currency risks. The investments' value in euros increases when a currency appreciates and, correspondingly, decreases when a currency depreciates.

Charges for this Fund

Fees paid by investors are used to cover the fund's operating costs, such as marketing and distribution costs. These costs reduce the possible return on the investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	1.00%

These are maximum fees that may be charged for the investment when units are subscribed for or redeemed.

Charges taken from the fund over a year

Ongoing charges	1.80%
------------------------	-------

Charges taken from the fund under specific conditions

Performance fee	No performance fee is charged for this Fund.
------------------------	--

For OP's owner-customers, the subscription and redemption fee is 0.00%. For more detailed information on fees can be found out in the price list, and from the management company or its agents.

The ongoing charges figure is based on expenses for the half-year ending 30th June 2022. The figure may vary from year to year. It excludes: Performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in other funds. For more information about charges, please see section Price List of the Prospectus, which is available at www.op.fi.
