

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OP-Moderate Fund, A-share class (ISIN: FI4000036108)

This fund is managed by OP Fund Management Company Ltd, which is part of the OP Group.

Objectives and Investment Policy

OP-Moderate Fund is a balanced fund investing its assets in the global fixed-income and equity markets. In the base scenario, the fund invests 50% of its assets in the fixed-income markets and 50% in the equity markets. The proportion of fixed-income investments may range between 30–70 % and equity investments between 30–70 %.

The fund's investments are primarily made through other funds. The fund may use derivatives instruments in its investment activities to hedge against market fluctuations, to replace direct investments and to otherwise promote efficient portfolio management. Primarily derivatives are used in equity and interest-rate risk management.

The Fund diversifies its investments on a broad basis among various companies and bonds, since the investments are mainly implemented using funds.

The investments underlying this fund do not take into account the EU criteria for environmentally sustainable economic activities. However, this fund integrates sustainability risks using the methods specified in the fund prospectus.

The Fund's benchmark index is a combination of several indexes. The composition of the benchmark index is described in the fund prospectus. With active investing, the Fund seeks to outperform its benchmark index in the long term. The Fund mainly takes notable active risk and it may differ significantly from the composition, weights and risk level of the benchmark index.

The Fund uses a relative Value at Risk (VaR) analysis to monitor total risk. The Fund's VaR may not be more than double the benchmark portfolio's VaR. More information on VaR calculation can be found in OP Fund Management Company's fund prospectus.

Any income received from the investments of the fund is reinvested in the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 4 years.

Shares in the mutual fund can be purchased, sold or changed Each Banking Day. If the execution order is received by 15:00:00', the order is executed to the value of the order date.

Risk and Reward Profile

The synthetic risk and reward indicator (SRRI) describes the risk of NAV fluctuation of units in the fund based on the actual fluctuation over the five preceding years. The indicator places the fund in category 4, which means that there is a moderate risk of NAV fluctuation associated with the fund unit. It should be noted that even the lowest risk category of 1 does not mean a risk-free investment. Historical data, such as those used in the calculation of the synthetic risk-reward indicator, do not necessarily give a reliable view of the future, and therefore the risk category of the fund may also change.

The key risks associated with the NAV performance of the fund are equity market risk, currency risk, credit risk and interest-rate risk.

Equity market risk may cause changes to the Fund's value because of general stock market developments or changes related to an individual company.

The Fund may invest in non-euro-area markets involving currency risks. The investments' value in euros increases when a currency appreciates and, correspondingly, decreases when a currency depreciates.

Credit risk may cause changes in the Fund's value when credit risk premiums rise or fall on the securities market or, for example, when an individual issuer ends up in default. As a rule, a rise in credit risk premiums affects the Fund's value and its holdings negatively and, correspondingly, a fall in credit risk premiums positively.

Interest rate risk may cause changes to the Fund's value when the general interest rate rises or falls. Changes in interest rates usually have a reverse effect on the Fund's value, i.e. a rise in the interest rate has a negative effect and a fall in the interest rate has a positive effect on the present value of investments.

Charges for this Fund

Fees paid by investors are used to cover the fund's operating costs, such as marketing and distribution costs. These costs reduce the possible return on the investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.50%

These are maximum fees that may be charged for the investment when units are subscribed for or redeemed.

Charges taken from the fund over a year

Ongoing charges	1.40%
------------------------	-------

Charges taken from the fund under specific conditions

Performance fee	No performance fee is charged for this Fund.
------------------------	--

For OP's owner-customers, the subscription and redemption fee is 0.00%. For more detailed information on fees can be found out in the price list, and from the management company or its agents.

The ongoing charges figure is based on expenses for the half-year ending 30th June 2022. The figure may vary from year to year. It excludes: Performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in other funds. For more information about charges, please see section Price List of the Prospectus, which is available at www.op.fi.
