

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OP-World Index Fund, A-share class (ISIN: FI4000261128)

This fund is managed by OP Fund Management Company Ltd, which is part of the OP Group.

Objectives and Investment Policy

OP-World Index is a passive index fund that invests assets according to the MSCI World ESG Universal Net Index in large listed companies diversified on a global basis. This means that the fund's investments are split between the countries and businesses of the benchmark index in the same proportion as in the index.

The Fund promotes environmental and social characteristics and, to ensure it, uses environmental, social and governance (ESG) analysis and excludes certain investments. For more information about the ESG methods used, see the fund prospectus. The "do no significant harm" principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Since the fund aims to generate the same returns as the benchmark index, it only keeps a small portion in cash for the purposes of redemptions. In order to lower its trading needs arising from redemptions and subscriptions, the fund may to a limited extent use derivative instruments in portfolio

management.

Since the fund's assets are invested in large-cap stocks, its investments can be highly concentrated on certain sectors, such as finance and industry.

The fund's trading costs are relatively low as changes to the portfolio are basically only made once a year in conjunction with index adjustments.

The Fund uses a relative Value at Risk (VaR) analysis to monitor total risk. The Fund's VaR may not be more than double the benchmark portfolio's VaR. More information on VaR calculation can be found in OP Fund Management Company's fund prospectus.

Any income received from the investments of the fund is reinvested in the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Shares in the mutual fund can be purchased, sold or changed Each Banking Day. If the execution order is received by 16:00:00, the order is executed to the value of the following banking day.

Risk and Reward Profile

The synthetic risk and reward indicator (SRRI) describes the risk of NAV fluctuation of units in the fund based on the actual fluctuation over the five preceding years. The indicator places the fund in category 6, which means that there is a high risk of NAV fluctuation associated with the fund unit. It should be noted that even the lowest risk category of 1 does not mean a risk-free investment. Historical data, such as those used in the calculation of the synthetic risk-reward indicator, do not necessarily give a reliable view of the future, and therefore the risk category of the

fund may also change.

For any period before the launch of the fund, the SRRI has been derived on the basis of the benchmark index.

Equity market risk and currency risk form the key risks associated with the NAV performance of the Fund.

Equity market risk may cause changes to the Fund's value because of general stock market developments or changes related to an individual company.

The Fund may invest in non-euro-area markets involving currency risks. The investments' value in euros increases when a currency appreciates and, correspondingly, decreases when a currency depreciates.

Full swing pricing may increase a fund unit's net asset value (NAV) fluctuation.

Charges for this Fund

Fees paid by investors are used to cover the fund's operating costs, such as marketing and distribution costs. These costs reduce the possible return on the investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are maximum fees that may be charged for the investment when units are subscribed for or redeemed.

Charges taken from the fund over a year

Ongoing charges	0.40%
------------------------	-------

Charges taken from the fund under specific conditions

Performance fee	No performance fee is charged for this Fund.
------------------------	--

For more detailed information on fees can be found out in the price list, and from the management company or its agents.

The ongoing charges figure is based on expenses for the half-year ending 30th June 2022. The figure may vary from year to year. It excludes: Performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in other funds. For more information about charges, please see section Price List of the Prospectus, which is available at www.op.fi.

This Fund applies full swing pricing. If the Fund has net asset inflows, the fund unit's NAV is adjusted upwards, using a swing factor. Correspondingly, if the Fund has net asset outflows, the fund unit's NAV is adjusted downwards, using a swing factor. The maximum amount of swing adjustment is 2.00% of the fund unit's NAV. For more information on swing pricing, please see the OP fund prospectus at www.op.fi.

Past Performance

Historical returns are not a guarantee of future returns.

Subscription and redemption fees are not taken into account in the return. The management fee is taken into account (deducted) in the return.

The Fund was launched in 2017.

The currency in which the past performance has been calculated is euro.

The benchmark of the Fund is MSCI World ESG Universal Net.

The Fund's benchmark index was MSCI World Total Return Index (Net dividends) until 13.10.2020.
