OP-Finland Index Fund, A-share class (ISIN: FI4000315692)

This fund is managed by OP Fund Management Company Ltd, which is part of the OP Group.

Objectives and Investment Policy

OP-Finland Index Fund is a passive index fund that invests its assets according to the index Nasdaq OMX Helsinki Benchmark Cap. This means that the Fund's investments are split between the companies of the benchmark index in the same proportion as in the index.

Since the Fund aims to generate the same returns as the benchmark index, it only keeps a small portion in cash for the purposes of redemptions. In order to lower its trading needs arising from redemptions and subscriptions, the Fund may to a limited extent use derivative instruments in portfolio management.

Due to the structure of the Fund, its investments can be highly concentrated on certain sectors, such as industry, finance and technology.

The Fund's trading costs are relatively low as changes to the

portfolio are basically only made in conjunction with index adjustments.

The Fund uses a relative Value at Risk (VaR) analysis to monitor total risk. The Fund's VaR may not be more than double the benchmark portfolio's VaR. More information on VaR calculation can be found in OP Fund Management Company's fund prospectus.

Any income received from the investments of the fund is reinvested in the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Shares in the mutual fund can be purchased, sold or changed Each Banking Day. If the execution order is received by 16:00:00', the order is executed to the value of the order date.

Risk and Reward Profile

The synthetic risk and reward indicator (SRRI) describes the risk of NAV fluctuation of units in the fund based on the actual fluctuation over the five preceding years. The indicator places the fund in category 6, which means that there is a high risk of NAV fluctuation associated with the fund unit. It should be noted that even the lowest risk category of 1 does not mean a risk-free investment. Historical data, such as those used in the calculation

of the synthetic risk-reward indicator, do not necessarily give a reliable view of the future, and therefore the risk category of the fund may also change.

For any period before the launch of the fund, the SRRI has been derived on the basis of the benchmark index.

Equity market risk and market area risk form the key risks associated with the NAV performance of the Fund.

Given that the Fund invests its assets in the equity market, the Fund's value may vary considerably depending on the market situation. Since the Fund invests its assets in the Finnish equity market, its investments are subject to country risk, which means a risk involved in an individual country.
