OP-Tactical Portfolio Fund

OP-Tactical Portfolio (Fund) is a balanced fund which mainly invests its assets in international equity and bond markets. In the basic allocation, the Fund invests 75% of its assets in equity markets and 25% in bond markets. The share of equity-linked instruments of the Fund's value may vary between 50% and 80% in the basic allocation. According to the portfolio management's view, the Fund may lower its equity weight to 20–50% for a short or intermediate-term in order to hedge against falling equity prices. The Fund makes investments mainly through other mutual funds. The Fund may use derivative instruments in order to hedge against adverse market movements, to replace direct investments and to otherwise promote effective portfolio management. Derivatives are chiefly used to manage equity and interest rate risks. The Fund also invests in non-euro-area markets involving currency risks. In the basic allocation, the Fund does not hedge against currency risk but may, according to the portfolio manager's view, take temporary hedging measures.

The investments underlying this fund do not take into account the EU criteria for environmentally sustainable economic activities. However, this fund integrates sustainability risks using the methods specified in the fund prospectus.

Social (S)	5.4		
Governance (G)	6.0	Coverage	87.5 %
The ESG risk level indicates how well to	the companies	The portfolio's carbon	intensity is the weighted

dollars).

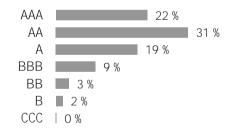

The ESG risk level indicates how well the companies included in the portfolio take account of the risks and opportunities related to environmental concerns, social concerns and corporate governance concerns relative to their sector. The companies are scored from 0 to 10 and then divided into seven ESG risk-level categories (AAA–CCC). The higher the score, the better the company included in the portfolio has prepared for ESG risks and opportunities.

M) Renewable energy 1.4 % Energy efficiency 3.2 % Environmentally friendly 0.4 % construction Sustainable use of water ed resources 0.2 % average of the portfolio companies' carbon Prevention of pollution 0.2 % dioxide intensity. The carbon footprint takes into account companies' greenhouse gas

Green revenues

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.
