Investment policy

OP-Corporate Bond (Fund) is a long-term bond fund which mainly invests its assets in euro-denominated bonds issued by European companies with a high credit rating. Fund assets may also be invested to a limited extent in bonds issued by companies in OECD member countries or domiciled in an OECD member country. The Fund invests a majority of its assets in securities of issuers whose long-term credit rating is at least Moody's Baa3 or S&P's BBB-. A maximum of 10% of the Fund's value may be invested in securities of non-rated issuers. The Fund's investments are mainly direct fixed-income investments. The Fund may use derivative instruments in order to hedge against adverse market movements, to replace direct investments and to otherwise promote effective portfolio management. The Fund may also invest in derivative contracts intended for credit risk transfer. Derivatives are chiefly used to manage interest rate and credit risks. The Fund's benchmark is Barclays Euro Aggregate Corporate. With active investing, the Fund seeks to outperform its benchmark index in the long term. The Fund mainly takes notable active risk and it may differ significantly from the composition, weights and risk level of the benchmark index.

Portfolio manager

Martti Saarinen

Responsibility

Responsible investing

The fund follows [OP Asset Management's principles for responsible investment](#). The consideration of responsibility in the investment analysis and decision making provides additional information in addition to the traditional financial and market information. The significant aspects of responsibility can in the long run affect the financial success of the investment objects and thus the return.

Exclusion

The fund excludes from its active, direct investments manufacturers of controversial weapons, mining companies that produce coal, electricity companies that use charcoal and companies that have violated international standards, and which have not been susceptible to impact. [The list of excluded investment items](#) is public.

Active ownership

OP's funds participate in domestic and foreign general meetings in accordance with [OP Fund Management Co's Ownership Policy](#), which takes responsibility into account. All in all, OP's funds participate annually in more than one thousand general meetings. OP Funds utilize the Annual General Meetings Institutional Shareholder Services Annual General Meeting analysis.

Violation of international standards

International standards, such as the UN Global Compact, set the minimum level of responsible business operations. OP Asset Management affects through OP funds that make active, direct investments such companies that are considered to have violated international standards. The goal is to get companies that have violated the standards to change their business and start to comply with the international standards in their business. We use the company Sustainalytics as a service provider to identify violations of international standards.

Thematic impact

OP Asset Management also affects companies through various themes of responsibility, such as issues related to climate change.

Read more about the OP Funds' practical ownership influence in [the overview of responsible investment](#) that is published twice a year.

ESG analysis

ESG-rating	A
Total ESG score	6,1
Environment (E)	6,6
Social (S)	4,7
Governance (G)	5,7

The ESG score indicates how well the portfolio's target companies take into account risks and opportunities related to the environment, social aspects and good governance in relation to their industry. The score scale is 0-10. After that, the score is divided into 7 classes. The higher the score, the better the portfolio companies have prepared for the risks and opportunities associated with ESG.

Companies' ESG classification

AAA = excellent, AA = very good, A = good, BBB = average, BB = satisfied, B = weak, CCC = very weak

Carbon intensity greenhouse gas emissions in tonnes / turnover (\$M)	183,8	Positive environmental impact	1,1 %
Coverage	58,0 %	Renewable energy	0,2 %
		Energy efficiency	0,4 %
		Environmentally friendly construction	0,1 %
		Sustainable use of water resources	0,0 %
		Prevention of pollution	0,2 %

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

The portfolio's positive environmental impact examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.

The portfolio's ESG analysis in relation to reference portfolios

	ESG	Carbon intensity	Positive environ- mental impact
Portfolio	6,1	183,8	1,1
World	5,9	178,2	3,6
Europe	7,3	147,4	3,3
Finland	7,3	329,5	8,2

The purpose of the monthly report is to provide its readers with information on the funds and their performance.
