## Investment policy

OP-Brave is a balanced fund investing its assets primarily in the global equity markets and partly in the global fixed-income markets. In the base scenario, the fund invests 80% of its assets in equity markets and 20% in the fixed-income markets. The proportion of equity investments may range between 70–100% and fixed-income investments between 0–30%. The fund's investments are primarily made through other investment funds. The fund may use derivatives instruments in its investment activities to hedge against market fluctuations, to replace direct investments and to otherwise promote efficient portfolio management. Primarily derivatives are used in equity and interest-rate risk management. The Fund diversifies its investments on a broad basis among various companies and bonds, since the investments are mainly implemented using funds.

The investments underlying this fund do not take into account the EU criteria for environmentally sustainable economic activities. However, this fund integrates sustainability risks using the methods specified in the fund prospectus.

## Portfolio manager

Harri Kojonen

## Responsibility

### Responsible investing

The fund follows [OP Asset Management's principles for responsible investment](#). The consideration of responsibility in the investment analysis and decision making provides additional information in addition to the traditional financial and market information. The significant aspects of responsibility can in the long run affect the financial success of the investment objects and thus the return.

Read more about the OP Funds' practical ownership influence in [the overview of responsible investment](#) that is published twice a year.

## ESG analysis

ESG-rating	AA	Carbon intensity greenhouse gas emissions in tonnes / turnover (\$M)	117.8	Green revenues	5.3 %
Total ESG score	7.2	Coverage	89.4 %	Renewable energy	1.2 %
Environment (E)	6.6			Energy efficiency	2.5 %
Social (S)	5.3			Environmentally friendly construction	0.7 %
Governance (G)	5.9			Sustainable use of water resources	0.2 %
				Prevention of pollution	0.3 %

The ESG score indicates how well the portfolio's target companies take into account risks and opportunities related to the environment, social aspects and good governance in relation to their industry. The score scale is 0-10. After that, the score is divided into 7 classes. The higher the score, the better the portfolio companies have prepared for the risks and opportunities associated with ESG.

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.

### Companies' ESG classification

### The portfolio's ESG analysis in relation to reference portfolios

	ESG	Carbon intensity	Green revenues
Portfolio	7.2	117.8	5.3
World	6.7	168.4	5.0
Europe	7.9	114.5	4.2
Finland	8.2	109.4	7.4

AAA = excellent, AA = very good, A = good, BBB = average, BB = satisfied, B = weak, CCC = very weak

The purpose of the monthly report is to provide its readers with information on the funds and their performance. Information provided in the report is no investment advice and no investment decisions should be made based on such information. The Key Investor Information Document for investors and the fund prospectus as well as the fund's annual report and half-yearly report are the documents that investors should read before making any subscription for fund units.
