Investment policy

OP-Tactical Portfolio (Fund) is a balanced fund which mainly invests its assets in international equity and bond markets. In the basic allocation, the Fund invests 75% of its assets in equity markets and 25% in bond markets. The share of equity-linked instruments of the Fund's value may vary between 50% and 80% in the basic allocation. According to the portfolio management's view, the Fund may lower its equity weight to 20–50% for a short or intermediate-term in order to hedge against falling equity prices. The Fund makes investments mainly through other mutual funds. The Fund may use derivative instruments in order to hedge against adverse market movements, to replace direct investments and to otherwise promote effective portfolio management. Derivatives are chiefly used to manage equity and interest rate risks. The Fund also invests in non-euro-area markets involving currency risks. In the basic allocation, the Fund does not hedge against currency risk but may, according to the portfolio manager's view, take temporary hedging measures.

The investments underlying this fund do not take into account the EU criteria for environmentally sustainable economic activities. However, this fund integrates sustainability risks using the methods specified in the fund prospectus.

ESG analysis

ESG-rating	AA	Carbon intensity greenhouse gas emissions in tonnes / turnover (\$M)	104.2	Green revenues	5.8 %
Total ESG score	7.5	Coverage	82.8 %	Renewable energy	1.0 %
Environment (E)	7.0			Energy efficiency	2.8 %
Social (S)	5.4			Environmentally friendly construction	1.5 %
Governance (G)	6.0			Sustainable use of water resources	0.2 %
				Prevention of pollution	0.2 %

The ESG score indicates how well the portfolio's target companies take into account risks and opportunities related to the environment, social aspects and good governance in relation to their industry. The score scale is 0-10. After that, the score is divided into 7 classes. The higher the score, the better the portfolio companies have prepared for the risks and opportunities associated with ESG.

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.

Companies' ESG classification

The portfolio's ESG analysis in relation to reference portfolios

AAA = excellent, AA = very good, A = good, BBB = average, BB = satisfied, B = weak, CCC = very weak
