Investment policy

OP-Fixed Income Portfolio Fund is a medium-term fixed-income fund investing its assets in the global fixed-income markets in instruments issued by governments, public sector entities and companies. The fund may also invest in emerging fixed-income markets. The Fund's investments are mainly based on direct fixed income investments but mutual fund investments are also possible. The fund may use derivatives instruments in its investment activities to hedge against market fluctuations, to replace direct investments and to otherwise promote efficient portfolio management. The fund's investments in foreign currencies may or may not be hedged against foreign exchange risk at the portfolio manager's discretion. The modified duration of the fund, a measure of its interest rate sensitivity, is typically 0–3. This indicates the negative NAV impact on the fund in terms of percentages if the interest rate level rises by one percentage point. As the level of interest rates decreases, the NAV of the fund increases accordingly. The Fund aims at a steady yield that outperforms the money market with lower value fluctuation than long-term corporate bond funds. To achieve this goal, the portfolio is compiled from widely diversified, intermediate-term and short-term fixed income instruments. The wide diversification is based on taking account of industry and issuer risks and a wide investment universe which includes both developed and emerging markets. The Fund's benchmark index is a combination of several indexes. The composition of the benchmark index is described in the fund prospectus. With active investing, the Fund seeks to outperform its benchmark index in the long term. The Fund mainly takes notable active risk and it may differ significantly from the composition, weights and risk level of the benchmark index.

Responsibility

Responsible investing

The fund follows [OP Asset Management's principles for responsible investment](#). The consideration of responsibility in the investment analysis and decision making provides additional information in addition to the traditional financial and market information. The significant aspects of responsibility can in the long run affect the financial success of the investment objects and thus the return.

Exclusion

The fund excludes from its active, direct investments manufacturers of controversial weapons, mining companies that produce coal, electricity companies that use charcoal and companies that have violated international standards, and which have not been susceptible to impact. [The list of excluded investment items](#) is public.

Active ownership

OP's funds participate in domestic and foreign general meetings in accordance with [OP Fund Management Co's Ownership Policy](#), which takes responsibility into account. All in all, OP's funds participate annually in more than one thousand general meetings. OP Funds utilize the Annual General Meetings Institutional Shareholder Services Annual General Meeting analysis.

Violation of international standards

International standards, such as the UN Global Compact, set the minimum level of responsible business operations. OP Asset Management affects through OP funds that make active, direct investments such companies that are considered to have violated international standards. The goal is to get companies that have violated the standards to change their business and start to comply with the international standards in their business. We use the company Sustainalytics as a service provider to identify violations of international standards.

Thematic impact

OP Asset Management also affects companies through various themes of responsibility, such as issues related to climate change.

Read more about the OP Funds' practical ownership influence in [the overview of responsible investment](#) that is published twice a year.

ESG analysis

ESG-rating

BBB

Total ESG score	5,0
Environment (E)	5,5
Social (S)	4,6
Governance (G)	4,9

The ESG score indicates how well the portfolio's target companies take into account risks and opportunities related to the environment, social aspects and good governance in relation to their industry. The score scale is 0-10. After that, the score is divided into 7 classes. The higher the score, the better the portfolio companies have prepared for the risks and opportunities associated with ESG.

Companies' ESG classification

Carbon intensity 299,3
greenhouse gas emissions in tonnes / turnover (\$M)

Coverage 35,7 %

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

The portfolio's ESG analysis in relation to reference portfolios

Positive environmental impact 2,3 %
Renewable energy 0,5 %
Energy efficiency 0,9 %
Environmentally friendly construction 0,4 %
Sustainable use of water resources 0,3 %
Prevention of pollution 0,2 %

The portfolio's positive environmental impact examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.

AAA = excellent, AA = very good, A = good, BBB = average, BB = satisfied, B = weak, CCC = very weak

The purpose of the monthly report is to provide its readers with information on the funds and their performance.
