Investment policy

OP-Latin America Fund is an equity fund investing its assets primarily in equity markets in Latin America and such other companies that conduct a major proportion of their business activities in Latin America. Key markets for the fund include Brazil, Mexico, Chile, Argentina, Colombia and Peru. Investments may also be made in smaller Latin American markets, such as Venezuela and Panama. Furthermore, investments in companies operating in Latin America can be made through companies listed in for example US, Canadian or European stock exchanges. The fund's investments are primarily made through direct equity investments. The fund may use derivatives instruments in its investment activities to hedge against market fluctuations, to replace direct investments and to otherwise promote efficient portfolio management. The fund's assets are diversified in the shares of many companies. Typically the fund invests its assets in shares of about 40–60, but the number may vary at the portfolio manager's discretion. The Fund's portfolio management makes investment decisions based on the market view prevailing at the time. The Fund's investment decisions particularly emphasise the portfolio manager's views on individual companies and weightings between the stock markets of different countries.

The investments underlying this fund do not take into account the EU criteria for environmentally sustainable economic activities. However, this fund integrates sustainability risks using the methods specified in the fund prospectus.

Responsibility

Responsible investing

The fund follows [OP Asset Management's principles for responsible investment](#). The consideration of responsibility in the investment analysis and decision making provides additional information in addition to the traditional financial and market information. The significant aspects of responsibility can in the long run affect the financial success of the investment objects and thus the return.

Exclusion

The fund excludes from its active, direct investments manufacturers of controversial weapons, mining companies that produce coal, electricity companies that use charcoal and companies that have violated international standards, and which have not been susceptible to impact. [The list of excluded investment items](#) is public.

Active ownership

OP's funds participate in domestic and foreign general meetings in accordance with [OP Fund Management Co's Ownership Policy](#), which takes responsibility into account. All in all, OP's funds participate annually in more than one thousand general meetings. OP Funds utilize the Annual General Meetings Institutional Shareholder Services Annual General Meeting analysis.

Violation of international standards

International standards, such as the UN Global Compact, set the minimum level of responsible business operations. OP Asset Management affects through OP funds that make active, direct investments such companies that are considered to have violated international standards. The goal is to get companies that have violated the standards to change their business and start to comply with the international standards in their business. We use external service provider to identify violations of international standards.

Thematic impact

OP Asset Management also affects companies through various themes of responsibility, such as issues related to climate change.

Read more about the OP Funds' practical ownership influence in [the overview of responsible investment](#) that is published twice a year.

ESG analysis

ESG-rating

BBB

Total ESG score	5.2
Environment (E)	5.9
Social (S)	4.9
Governance (G)	4.4

The ESG score indicates how well the portfolio's target companies take into account risks and opportunities related to the environment, social aspects and good governance in relation to their industry. The score scale is 0-10. After that, the score is divided into 7 classes. The higher the score, the better the portfolio companies have prepared for the risks and opportunities associated with ESG.

Companies' ESG classification

Carbon intensity 270.2
greenhouse gas emissions in tonnes / turnover (\$M)

Coverage 98.3 %

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

Green revenues	2.5 %
Renewable energy	0.9 %
Energy efficiency	0.8 %
Environmentally friendly construction	0.5 %
Sustainable use of water resources	0.3 %
Prevention of pollution	0.0 %

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.

The portfolio's ESG analysis in relation to reference portfolios

	ESG	Carbon intensity	Green revenues
Portfolio	5.2	270.2	2.5
World	6.7	161.7	5.1
Europe	7.9	114.7	4.2
Finland	8.3	110.6	7.4

AAA = excellent, AA = very good, A = good, BBB = average, BB = satisfied, B = weak, CCC = very weak

The purpose of the monthly report is to provide its readers with information on the funds and their performance. Information provided in the report is no investment advice and no investment decisions should be made based on such information.
