Lower risk

OP-Conservative Fund

31.3.2024

OP-Conservative Fund is a balanced fund investing its assets primarily in global fixed-income markets and partly in the global equity markets. In the base scenario, the fund invests 80% of its assets in the fixed-income markets and 20% in the equity markets. The proportion of fixed-income investments may range between 70–100% and equity investments between 0–30 %. The fund's investments are primarily made through other funds. The fund may use derivatives instruments in its investment activities to hedge against market fluctuations, to replace direct investments and to otherwise promote efficient portfolio management. Primarily derivatives are used in equity and interest-rate risk management. The Fund diversifies its investments on a broad basis among various companies and bonds, since the investments are mainly implemented using funds.

The Fund promotes environmental and social characteristics and, to ensure it, uses environmental, social and governance (ESG) analysis and excludes certain investments. For more information about the ESG methods used, see the fund prospectus. The "do no significant harm" principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Responsibility

Responsible investing

The fund complies with OP Asset Management's principles for responsible investment where applicable.

ESG risk level	A
Total ESG score	7.1
Environment (E)	7.1
Social (S)	5.1
Governance (G)	5.9

The ESG risk level indicates how well the companies included in the portfolio take account of the risks and opportunities related to environmental concerns, social concerns and corporate governance concerns relative to their sector. The companies are scored from 0 to 10 and then divided into seven ESG risk-level categories (AAA–CCC). The higher the score, the better the company included in the portfolio has prepared for ESG risks and opportunities.

Carbon intensity gre	87.9 enhouse gas emissions in tonnes / turnover (\$M)			
Coverage	67.3 %			
The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon featurint takes				

average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

Green revenues	4.8 %
Renewable energy	0.9 %
Energy efficiency	2.7 %
Environmentally friendly	
construction	0.7 %
Sustainable use of water	
resources	0.1 %
Prevention of pollution	0.2 %

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.
