Kuntarahoitus Oyj	3.3 %

## Investment policy

OP-Bond Yield (Fund) is a long-term bond fund that mainly invests in fixed-income instruments issued by euro area governments with a minimum credit rating of BBB- or comparable. These investments' share of the Fund's value may vary between 75% and 100%. The Fund's investments are mainly direct fixed-income investments. The Fund may use derivative instruments in order to hedge against adverse market movements, to replace direct investments and to otherwise promote effective portfolio management. Derivative contracts used in portfolio management can include, for example, interest rate swaps or futures whose underlying instruments are government bonds. The Fund hedges its non-euro investments against currency risks as fully as possible. The modified duration of the Fund, a measure of the price sensitivity of a fixed-income investment to interest rate movements, is typically 6–10, which means that the Fund value will decrease by 6–10 percent if interest rates increase by one percentage point. If interest rates fall, the Fund's value increases correspondingly. The Fund's portfolio management makes investment decisions on the basis of the prevailing market view at the time. The Fund's investment decisions specifically highlight controlling the Fund's interest rate risk and interest rate risk distribution and weights between various countries.

The investments underlying this fund do not take into account the EU criteria for environmentally sustainable economic activities. However, this fund integrates sustainability risks using the methods specified in the fund prospectus.

## Portfolio manager

Lauri Laaksonen

## Responsibility

### Responsible investing

The fund follows [OP Asset Management's principles for responsible investment](#). The consideration of responsibility in the investment analysis and decision making provides additional information in addition to the traditional financial and market information. The significant aspects of responsibility can in the long run affect the financial success of the investment objects and thus the return.

### Exclusion

The fund excludes from its active, direct investments manufacturers of controversial weapons, mining companies that produce coal, electricity companies that use charcoal and companies that have violated international standards, and which have not been susceptible to impact. [The list of excluded investment items](#) is public.

### Active ownership

OP's funds participate in domestic and foreign general meetings in accordance with [OP Fund Management Co's Ownership Policy](#), which takes responsibility into account. All in all, OP's funds participate annually in more than one thousand general meetings. OP Funds utilize the Annual General Meetings Institutional Shareholder Services Annual General Meeting analysis.

### Violation of international standards

International standards, such as the UN Global Compact, set the minimum level of responsible business operations. OP Asset Management affects through OP funds that make active, direct investments such companies that are considered to have violated international standards. The goal is to get companies that have violated the standards to change their business and start to comply with the international standards in their business. We use external service provider to identify violations of international standards.

### Thematic impact

OP Asset Management also affects companies through various themes of responsibility, such as issues related to climate change.

Read more about the OP Funds' practical ownership influence in [the overview of responsible investment](#) that is published twice a year.

## ESG analysis

### ESG-rating

AA

Total ESG score	7.6
Environment (E)	7.8
Social (S)	5.9
Governance (G)	6.5

The ESG score indicates how well the portfolio's target companies take into account risks and opportunities related to the environment, social aspects and good governance in relation to their industry. The score scale is 0-10. After that, the score is divided into 7 classes. The higher the score, the better the portfolio companies have prepared for the risks and opportunities associated with ESG.

### Companies' ESG classification

### Carbon intensity

3.3

greenhouse gas emissions in tonnes / turnover (\$M)

### Coverage

16.8 %

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

### Green revenues

-

### Renewable energy

-

### Energy efficiency

-

### Environmentally friendly construction

-

### Sustainable use of water resources

-

### Prevention of pollution

-

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.

### The portfolio's ESG analysis in relation to reference portfolios

	ESG	Carbon intensity	Green revenues
Portfolio	7.6	3.3	-
World	6.7	168.4	5.0
Europe	7.9	114.5	4.2
Finland	8.2	109.4	7.4

AAA = excellent, AA = very good, A = good, BBB = average, BB = satisfied, B = weak, CCC = very weak
