Investment policy

OP-Asia Index Fund is a passive index fund whose assets are invested in accordance with the MSCI Pacific Total Return Index (Net dividends) Index in equities of the largest listed companies in South-East Asia. This means that the assets of the fund are distributed in the countries and companies constituting the benchmark index in the same proportions as in the benchmark index. Since the fund strives to replicate the performance of the benchmark index as closely as possible, it will only maintain a small cash position to pay for redemptions. In order to reduce securities transactions resulting from redemptions and subscriptions, the fund may use derivatives instruments in its portfolio management to a limited extent. Since the assets of the fund are invested in equities of the largest companies by market capitalisation, its investments may be concentrated significantly in certain sectors, such as financials and industrials. Changes are made in the portfolio of the fund primarily only in connection with the annual index revisions, which is why the trading expenses of the fund are relatively low.

Portfolio manager

OP Asset Management Ltd

Responsibility

Responsible investing

The fund complies with [OP Asset Management's principles for responsible investment](#) where applicable.

Active ownership

OP's funds participate in domestic and foreign general meetings in accordance with [OP Fund Management Co's Ownership Policy](#), which takes responsibility into account. All in all, OP's funds participate annually in more than one thousand general meetings. OP Funds utilize the Annual General Meetings Institutional Shareholder Services Annual General Meeting analysis.

Thematic impact

OP Asset Management also affects companies through various themes of responsibility, such as issues related to climate change.

Read more about the OP Funds' practical ownership influence in the [overview of responsible investment](#) that is published twice a year.

ESG-analysis

ESG-rating A

Total ESG score	6,0
Environment (E)	6,0
Social (S)	5,2
Governance (G)	4,9

The ESG score indicates how well the portfolio's target companies take into account risks and opportunities related to the environment, social aspects and good governance in relation to their industry. The score scale is 0-10. After that, the score is divided into 7 classes. The higher the score, the better the portfolio companies have prepared for the risks and opportunities associated with ESG.

Carbon intensity 141,0
greenhouse gas emissions in tonnes / turnover (\$M)

Coverage 94,6 %

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

Positive environmental impact	4,8 %
Renewable energy	0,3 %
Energy efficiency	2,7 %
Environmentally friendly construction	1,4 %
Sustainable use of water resources	0,1 %
Prevention of pollution	0,2 %

The portfolio's positive environmental impact examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.

Companies' ESG classification

The portfolio's ESG analysis in relation to reference portfolios

	ESG	Carbon intensity	Positive environmental impact
Portfolio	6,0	141,0	4,8
World	5,9	178,2	3,6
Europe	7,3	147,4	3,3
Finland	7,3	329,5	8,2

AAA = excellent, AA = very good, A = good, BBB = average, BB = satisfied, B = weak, CCC = very weak
