Investment policy

OP-Nordic Countries Index Fund is a passive index fund whose assets are invested in accordance with the MSCI Nordic Countries ESG Screened Net Index in equities of largest listed companies in Sweden, Denmark, Finland and Norway. This means that the assets of the fund are distributed in the countries and companies constituting the benchmark index in the same proportions as in the benchmark index. Since the fund strives to replicate the performance of the benchmark index as closely as possible, it will only maintain a small cash position to pay for redemptions. In order to reduce securities transactions resulting from redemptions and subscriptions, the fund may use derivatives instruments in its portfolio management to a limited extent. Since the assets of the fund are invested in equities of the largest companies by market capitalisation, its investments may be concentrated significantly in certain sectors, such as industrials, financials and technology. The Fund's trading costs are relatively low as changes to the portfolio are basically only made in conjunction with index adjustments.

The Fund promotes environmental and social characteristics by considering investments' ESG factors as part of the investment process and through the exclusion of certain investment options. For more information about the ESG methods used, see the fund prospectus. The principle of 'do no significant harm' is only applied to those investments included in the fund which integrate the EU's criteria for environmentally sustainable economic activities. The EU's criteria for environmentally sustainable economic activities are not integrated in terms of other investments included in this fund.

Coverage

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

Renewable energy

3.6 %

Energy efficiency

0.7 %

Environmentally friendly construction

0.0 %

Sustainable use of water resources

0.1 %

Prevention of pollution

0.0 %

The ESG risk level indicates how well the companies included in the portfolio take account of the risks and opportunities related to environmental concerns, social concerns and corporate governance concerns relative to their sector. The companies are scored from 0 to 10 and then divided into seven ESG risk-level categories (AAA–CCC). The higher the score, the better the company included in the portfolio has prepared for ESG risks and opportunities.

Distribution of companies' ESG risk levels

The portfolio's ESG analysis in relation to reference portfolios

	ESG	Carbon intensity	Green revenues
Portfolio	8.2	32.1	5.9
World	6.8	117.4	6.2
Europe	7.9	86.5	4.6
Finland	8.8	138.5	8.1
