Investment policy

OP-Yield Fund is an enhanced short-term fixed-income fund investing its assets primarily in euro-denominated fixed-income securities issued by European banks and other companies as well as European governments and other public sector entities. In the short term, the fund seeks capital preservation, and in the medium term, a return exceeding to the money market return. The fund's investments are primarily made through direct note and bond investments, but the fund may also use interest rate and credit risk derivatives to hedge against market fluctuations and to replace direct investments. The investment instruments used typically comprise floating rate bonds, commercial paper, debt certificates, short-term fixed interest notes and deposits. The fund's assets are diversified in the fixed-income instruments of many issuers. The modified duration of the fund, a measure of its interest rate sensitivity, is typically 0.4–0.8. This indicates the negative NAV impact on the fund in terms of percentages, if the interest rate level rises by one percentage point. As the level of interest rates decreases, the NAV of the fund increases accordingly. The fund's average remaining maturity, that is the period until the repayment of principal, may however be long mostly due to investments in floating-rate bonds. Therefore, changes in credit risk premia or insolvency of issuers may have a material impact on the NAV of the fund. The fund's investments are diversified primarily in fixed-income instruments of issuers with good creditworthiness. The fund may have a limited amount of investments in fixed-income instruments of issuers with a weak credit rating. Furthermore, the fund may invest in fixed-income instruments of non-rated issuers.

The Fund promotes environmental and social characteristics and, to ensure it, uses environmental, social and governance (ESG) analysis and excludes certain investments. For more information about the ESG methods used, see the fund prospectus. The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Responsibility

Responsible investing

The fund follows [OP Asset Management's principles for responsible investment](#). The consideration of responsibility in the investment analysis and decision making provides additional information in addition to the traditional financial and market information. The significant aspects of responsibility can in the long run affect the financial success of the investment objects and thus the return.

Exclusion

The fund excludes from its active, direct investments manufacturers of controversial weapons, mining companies that produce coal, electricity companies that use charcoal and companies that have violated international standards, and which have not been susceptible to impact. [The list of excluded investment items](#) is public.

Active ownership

OP's funds participate in domestic and foreign general meetings in accordance with [OP Fund Management Co's Ownership Policy](#), which takes responsibility into account. All in all, OP's funds participate annually in more than one thousand general meetings. OP Funds utilize the Annual General Meetings Institutional Shareholder Services Annual General Meeting analysis.

Violation of international standards

International standards, such as the UN Global Compact, set the minimum level of responsible business operations. OP Asset Management affects through OP funds that make active, direct investments such companies that are considered to have violated international standards. The goal is to get companies that have violated the standards to change their business and start to comply with the international standards in their business. We use external service provider to identify violations of international standards.

Thematic impact

OP Asset Management also affects companies through various themes of responsibility, such as issues related to climate change.

Read more about the OP Funds' practical ownership influence in [the overview of responsible investment](#) that is published twice a year.

ESG analysis

ESG-rating

AA

Total ESG score	7.3
Environment (E)	7.1
Social (S)	5.1
Governance (G)	6.3

The ESG score indicates how well the portfolio's target companies take into account risks and opportunities related to the environment, social aspects and good governance in relation to their industry. The score scale is 0-10. After that, the score is divided into 7 classes. The higher the score, the better the portfolio companies have prepared for the risks and opportunities associated with ESG.

Companies' ESG classification

Carbon intensity

93.8

greenhouse gas emissions in tonnes / turnover (\$M)

Coverage

95.7 %

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

Green revenues

5.1 %

Renewable energy	0.7 %
Energy efficiency	2.4 %
Environmentally friendly construction	1.1 %
Sustainable use of water resources	0.4 %
Prevention of pollution	0.4 %

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.

The portfolio's ESG analysis in relation to reference portfolios

AAA = excellent, AA = very good, A = good, BBB = average, BB = satisfied, B = weak, CCC = very weak
