Investment policy

OP-Finland Index Fund is a passive index fund that invests its assets according to the index Nasdaq OMX Helsinki Benchmark Cap. This means that the Fund's investments are split between the companies of the benchmark index in the same proportion as in the index. Since the Fund aims to generate the same returns as the benchmark index, it only keeps a small portion in cash for the purposes of redemptions. In order to lower its trading needs arising from redemptions and subscriptions, the Fund may to a limited extent use derivative instruments in portfolio management. Due to the structure of the Fund, its investments can be highly concentrated on certain sectors, such as industry, finance and technology. The Fund's trading costs are relatively low as changes to the portfolio are basically only made in conjunction with index adjustments.

The investments underlying this fund do not take into account the EU criteria for environmentally sustainable economic activities. However, this fund integrates sustainability risks using the methods specified in the fund prospectus.

Portfolio manager

Tero Halme

Responsibility

Responsible investing

The fund complies with [OP Asset Management's principles for responsible investment](#) where applicable.

Active ownership

OP's funds participate in domestic and foreign general meetings in accordance with [OP Fund Management Co's Ownership Policy](#), which takes responsibility into account. All in all, OP's funds participate annually in more than one thousand general meetings. OP Funds utilize the Annual General Meetings Institutional Shareholder Services Annual General Meeting analysis.

Thematic impact

OP Asset Management also affects companies through various themes of responsibility, such as issues related to climate change.

Read more about the OP Funds' practical ownership influence in the [overview of responsible investment](#) that is published twice a year.

ESG-analysis

ESG risk level	AAA	Carbon intensity	146.3	Green revenues	9.1 %
Total ESG score	8.9	greenhouse gas emissions in tonnes / turnover (\$M)		Renewable energy	3.1 %
Environment (E)	6.2	Coverage	98.7 %	Energy efficiency	1.2 %
Social (S)	5.6			Environmentally friendly construction	0.2 %
Governance (G)	7.4			Sustainable use of water resources	0.4 %
				Prevention of pollution	0.4 %

The ESG risk level indicates how well the companies included in the portfolio take account of the risks and opportunities related to environmental concerns, social concerns and corporate governance concerns relative to their sector. The companies are scored from 0 to 10 and then divided into seven ESG risk-level categories (AAA-CCC). The higher the score, the better the company included in the portfolio has prepared for ESG risks and opportunities.

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.
