## Largest holdings

OP-Target 4 is an actively managed balanced fund which mainly invests its assets in global stock and fixed income markets. The Fund may also invest in the units of other mutual funds. The Fund's investment policy regarding stock and fixed income investments is determined by a preset range of volatility (risk level). The historical volatility of the Fund's investments is continuously monitored. Changes in volatility may lead to changes in the Fund's investment allocation between stocks and fixed income investments. This Fund's target volatility range is 12–20%, which is why it will mainly invest in stocks. The Fund may use derivative instruments to hedge against market movements, to replace direct investments and to otherwise promote effective portfolio management. Derivatives are typically used to manage equity and interest rate risks. The Fund's fixed income investments mainly focus on fixed income instruments issued by public-sector entities and companies with high credit ratings based in Europe and the OECD countries.

The Fund promotes environmental and social characteristics by considering investments' ESG factors as part of the investment process and through the exclusion of certain investment options. For more information about the ESG methods used, see the fund prospectus. The principle of 'do no significant harm' is only applied to those investments included in the fund which integrate the EU's criteria for environmentally sustainable economic activities. The EU's criteria for environmentally sustainable economic activities are not integrated in terms of other investments included in this fund.

OP Asset Management Ltd

## Responsibility

Responsible investing

The fund complies with OP Asset Management's principles for responsible investment where applicable.

## ESG analysis

AA	Carbon
7.6	
6.8	
5.4	
6.1	Coverag
	6.8 5.4

The ESG risk level indicates how well the companies included in the portfolio take account of the risks and opportunities related to environmental concerns, social concerns and corporate governance concerns relative to their sector. The companies are scored from 0 to 10 and then divided into seven ESG risk-level categories (AAA–CCC). The higher the score, the better the company included in the portfolio has prepared for ESG risks and opportunities.

Carbon intensity 73.5
greenhouse gas emissions in tonnes / turnover (\$M)

Coverage 100.0 %

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

Green revenues 5.8 %

Renewable energy 0.4 %
Energy efficiency 5.0 %
Environmentally friendly construction 0.4 %
Sustainable use of water resources 0.1 %
Prevention of pollution 0.0 %

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.
