## Investment policy

OP-Real Asset Companies Fund is an equity fund which invests its assets mainly in Western European equity markets, in the stocks of companies that invest in real estate, infrastructure and forest, or whose business otherwise involves these sectors. The fund mainly focuses its investments on rental apartments, commercial properties and logistics real estate. The Fund mainly invests directly in equities. The Fund may use derivative instruments in order to hedge against adverse market movements, to replace direct investments and to otherwise promote effective portfolio management. The Fund's equity market exposure may vary between 75% and 100% of the Fund's value. The equity weighting typically varies between 90% and 100%. The Fund diversifies its equity investments across various companies. The Fund typically invests in equities of about 30–50 companies but this number may vary depending on the portfolio manager's view.

The Fund promotes environmental and social characteristics by considering investments' ESG factors as part of the investment process and through the exclusion of certain investment options. For more information about the ESG methods used, see the fund prospectus. The principle of 'do no significant harm' is only applied to those investments included in the fund which integrate the EU's criteria for environmentally sustainable economic activities. The EU's criteria for environmentally sustainable economic activities are not integrated in terms of other investments included in this fund.

Minna Laine

Responsibility

Responsible investing

The fund follows [OP Asset Management's principles for responsible investment](#). The consideration of responsibility in the investment analysis and decision making provides additional information in addition to the traditional financial and market information. The significant aspects of responsibility can in the long run affect the financial success of the investment objects and thus the return.

Exclusion

The fund excludes from its active, direct investments manufacturers of controversial weapons, mining companies that produce coal, electricity companies that use charcoal and companies that have violated international standards, and which have not been susceptible to impact. [The list of excluded investment items](#) is public.

Active ownership

OP's funds participate in domestic and foreign general meetings in accordance with [OP Fund Management Co's Ownership Policy](#), which takes responsibility into account. All in all, OP's funds participate annually in more than one thousand general meetings. OP Funds utilize the Annual General Meetings Institutional Shareholder Services Annual General Meeting analysis.

Violation of international standards

International standards, such as the UN Global Compact, set the minimum level of responsible business operations. OP Asset Management affects through OP funds that make active, direct investments such companies that are considered to have violated international standards. The goal is to get companies that have violated the standards to change their business and start to comply with the international standards in their business. We use external service provider to identify violations of international standards.

Thematic impact

OP Asset Management also affects companies through various themes of responsibility, such as issues related to climate change.  
  
Read more about the OP Funds' practical ownership influence in [the overview of responsible investment](#) that is published twice a year.

ESG analysis

|                 |     |
|-----------------|-----|
| ESG risk level  | AA  |
| Total ESG score | 7.9 |
| Environment (E) | 6.9 |
| Social (S)      | 6.3 |
| Governance (G)  | 7.2 |

The ESG risk level indicates how well the companies included in the portfolio take account of the risks and opportunities related to environmental concerns, social concerns and corporate governance concerns relative to their sector. The companies are scored from 0 to 10 and then divided into seven ESG risk-level categories (AAA–CCC). The higher the score, the better the company included in the portfolio has prepared for ESG risks and opportunities.

Distribution of companies' ESG risk levels

|                                                     |       |
|-----------------------------------------------------|-------|
| Carbon intensity                                    | 116.9 |
| greenhouse gas emissions in tonnes / turnover (\$M) |       |

|          |        |
|----------|--------|
| Coverage | 99.7 % |
|----------|--------|

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

|                                       |        |
|---------------------------------------|--------|
| Green revenues                        | 24.1 % |
| Renewable energy                      | 3.5 %  |
| Energy efficiency                     | 0.9 %  |
| Environmentally friendly construction | 19.2 % |
| Sustainable use of water resources    | 0.5 %  |
| Prevention of pollution               | -      |

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.

The portfolio's ESG analysis in relation to reference portfolios

|           | ESG | Carbon intensity | Green revenues |
|-----------|-----|------------------|----------------|
| Portfolio | 7.9 | 116.9            | 24.1           |
| World     | 6.8 | 118.9            | 6.1            |
| Europe    | 7.9 | 87.3             | 4.6            |
| Finland   | 8.8 | 150.2            | 9.0            |

The purpose of the monthly report is to provide its readers with information on the funds and their performance.
